Bio Security for INNISFAIL Show

“Working Together for Animal Health” - In order to protect the welfare of animals attending the 2019 Show the following procedures are in place to ensure the safety of both our Competitors and their horses:

A veterinarian will be on call during the event

A method of making emergency phone calls or alternative communication

- A plan to minimise public access to stable areas
- Designation of an isolation area for sick horses
- Encouraging good hygiene practice between horses for officials/stewards
- Identification of horses
- Do not share equipment, including food and water containers, between horses.
Avoid use of communal water troughs.

The Innisfail Show Association makes the following recommendations for all competitors:

Primary responsibility for biosecurity at horse events lies with the horse owners/competitors, long before the event.

- Practice good biosecurity, good hygiene and decontamination of equipment.
- Wash your hands with soap and water or use hand wipes and waterless hand hygiene solution immediately after handling horses.
- Do not knowingly take sick horses to an event.
- If a horse is unwell at an event, notify an event official.
- Stop all non-essential contact with the sick horse and blood or body fluids from the horse until a veterinarian has excluded Hendra virus infection as the cause of illness.
- Do not allow children to have close contact with a sick horse, at least until infection has been ruled out by a veterinarian.
- Promptly isolate sick horses and seek veterinary advice. Also isolate any equipment that has come in contact with the sick horse.

It is important that each person intending on bringing a horse to this upcoming competition fills out the Horse Health Declaration Form (Pre Movement Biosecurity Form) and return it to the Innisfail Show Association centre ring before competing

Innisfail and District Show Society strongly recommend all horse owners to vaccinate as we head towards the peak winter risk period for Hendra. Vaccination is the best way to reduce the risk of Hendra infection. Sadly, human infection and deaths have occurred from high-level exposure to body fluids from infected horses. By vaccinating, owners aren't just protecting their horses, they're also protecting themselves, their family and employees.
